## They all happily agree that YOU CAN'T BEAT FUNK G HYBRIDS

These smiling Funk G growers have found that they are ALWAYS AHEAD with Funk G Hybrids. They know that for consistently heavy yields of both husking and silage corn . . . to use their own words, "You just can't beat Funk G Hybrids."

Yes, you too will find that for dependable heavy crops, despite attacks by drouth, insects, storms, and any other corn enemies, you'll be ALWAYS AHEAD with Hoffman Funk G Hybrids. Their bred-in ability to produce those EXTRA bushels of husking corn—

those EXTRA tons of nourishing silage—will mean MORE PROFITS from your cornfields EVERY YEAR!

You can join the growing host of Funk G boosters with every confidence of having a splendid corn crop this fall. Every hybrid offered here is a product of the second-to-none Funk G breeding staff . . . and is thoroughly tested and proven by Hoffman here in the East under conditions like those on your farm. For best yields you need a hybrid of just the right maturity . . . a hybrid adapted to your type of soil . . . this vast Hoffman testing program assures you of getting the exact RIGHT HYBRID for your job.

### ORDER NOW!

Funk G stocks are moving out rapidly . . . but for prompt orders there are still available very early corns that are definitely safe for husking in the short season, high altitude areas of northern Pennsylvania and New York. Also, long season varieties adapted as far south as Virginia . . . and other hybrids that will do a fine job for husking or silage under all conditions between these two extremes. However, supplies are limited, and delay on your part could mean disappointment. ORDER YOUR FUNK G SEED TODAY!

### SOY BEANS

Useful for hay—meal—pasture—silage . . . soy beans offer a wide variety of most nutritious high-protein feeds. Be sure to inoculate for best results.

**WILSON BLACK** type: The most popular variety for hay purposes; often yields two to four tons of high-protein hay per acre. Its rich growth makes it a good pasture variety, too. Is frequently planted along with corn for silage.

**LINCOLN** type: Outstanding yellow variety gaining in use for bean production. Has yielded up to 25% over others . . . stands up well . . . high oil content. Fine quality seed now in stock—supply limited.

### SUDAN

Sudan grass has been a life-saver on many farms during dry years; has provided quick summer hay and pasture when everything else failed. Helps hold milk production up through the period when regular pastures are least productive.

**SWEET SUDAN:** Is juicy, sweet, broad-leaved, very palatable to livestock. Has definite disease resistance bred into it. Provides longer grazing season. Is gaining considerably in popularity in recent years.

**REGULAR TYPE SUDAN:** Quick-growing; often ready to cut 50 to 70 days after planting. Considered about equal to timothy hay in feeding value. Is often mixed with soys for green feed.

### RYE GRASS

Don't overlook the importance of this soil-saving . . . soil-building cover crop. Should be sown in every cornfield; one bushel per acre at the last cultivation. Goes a long way towards stopping soil-washing; adds humus to the soil to benefit following crops.

Rye Grass is becoming more useful every year . . . after early vegetable crops—as orchard cover—in potato ground—as supplementary pasture . . . certainly the No. 1 cover crop.

Here for you is finest quality seed. Cleaned and re-cleaned, 99 per cent or better purity, high germination. Cost is low; pays its way many times over.

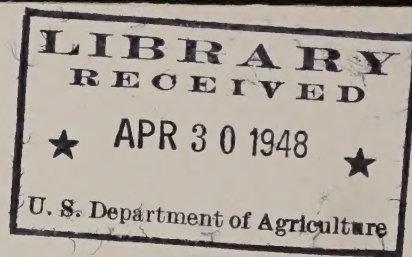

Whatever your additional last-minute seed needs may be, Hoffman stands ready to supply you. Buckwheat . . . the grain crop to help out in any feed shortage. Hoffman sweet corns . . . for an extra cash crop or for fine eating this summer. Rape . . . fine for hog, sheep, or poultry pasture. Millets . . . for a quick-growing emergency hay crop. Vetch and crimson clover . . . for soil-building. Sorghum . . . valuable for green forage or ensilage.

Today, as always since 1899, you can depend on receiving from Hoffman only finest quality, clean, dependable seed. Prices are right . . . stocks are here ready for prompt shipment. MAIL YOUR ORDER TODAY!
